

A TEACHER'S GUIDE

---

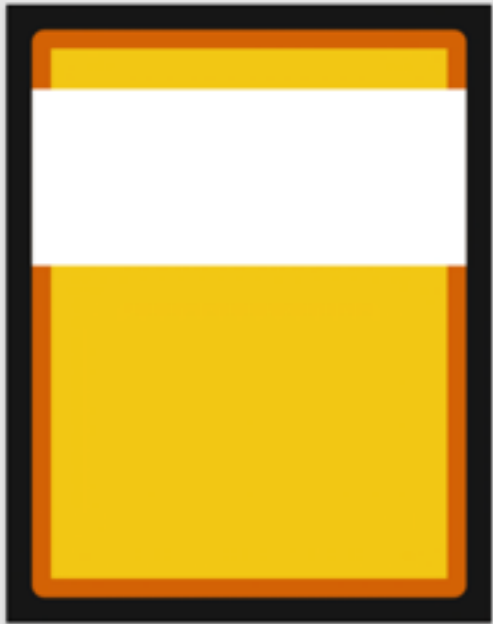

# GOODNOTES APP

- 🌀 **Electronic exercise book**
- 🌀 **Compile range of media**  
PDF worksheets / photos / written text / sketches
- 🌀 **Better tools for writing, highlighting, annotating**
- 🌀 **Quick and easy backup of work**
- 🌀 **Easy to archive and use for revision as PDF**
- 🌀 **Pre-populated Notebooks can be imported**

---

# WHY GOODNOTES?

Notebook  
13 Oct 2016, 13:47

- 🌀 **Create notebooks for different topics**
- 🌀 **Avoid one notebook for entire year (or even term)**
- 🌀 **Encourage use of covers**
- 🌀 **Add clear title to the notebook**
- 🌀 **Give the notebook a sensible name**

---

# NOTEBOOKS SUGGESTIONS

Training

Trash

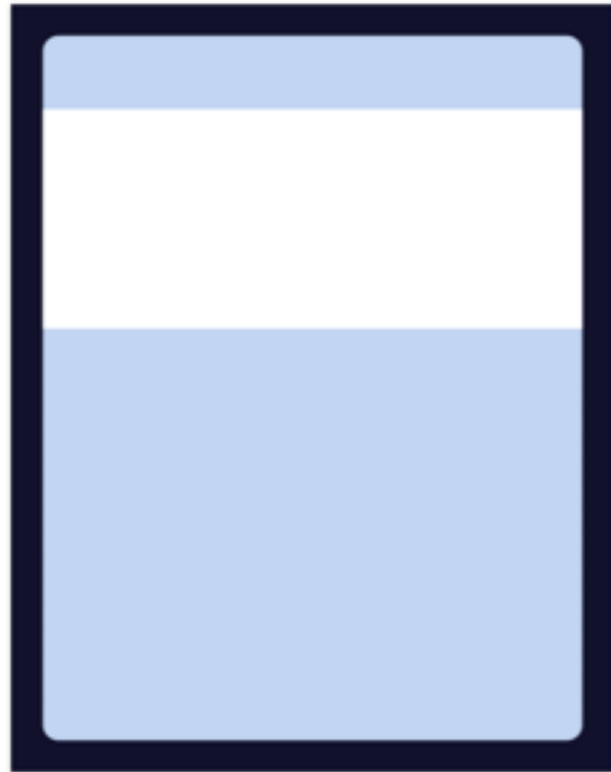

- 👁️ **Key to GoodNotes organisation**
- 👁️ **Create a category for your subject**
- 👁️ **Avoid lots of sub-categories / topic categories**
- 👁️ **Create topic notebooks within the category**

---

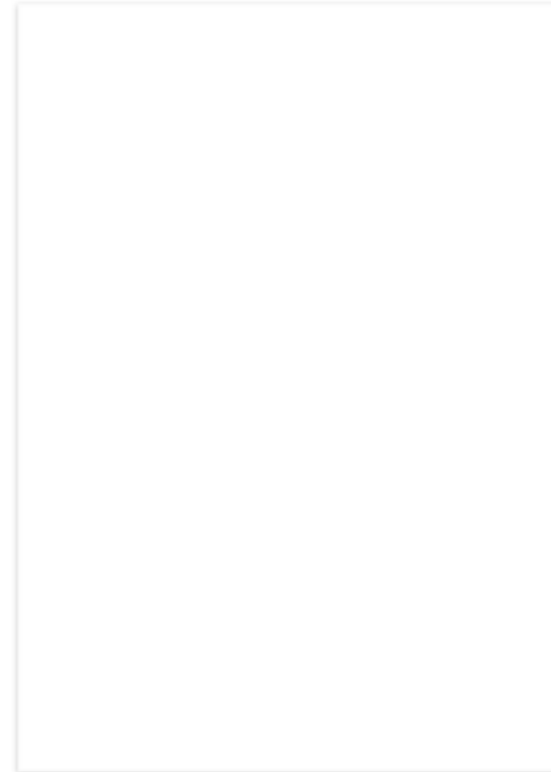

# CATEGORIES

Create Notebook

Cancel

Enclosed 2

Plain Paper

Notebook

Create

- 👁 In category tap on + (top left)
- 👁 Create new notebook
- 👁 Give it a sensible name
- 👁 Choose cover style
- 👁 Choose default paper type (lots of options available)

# NOTEBOOK CREATION

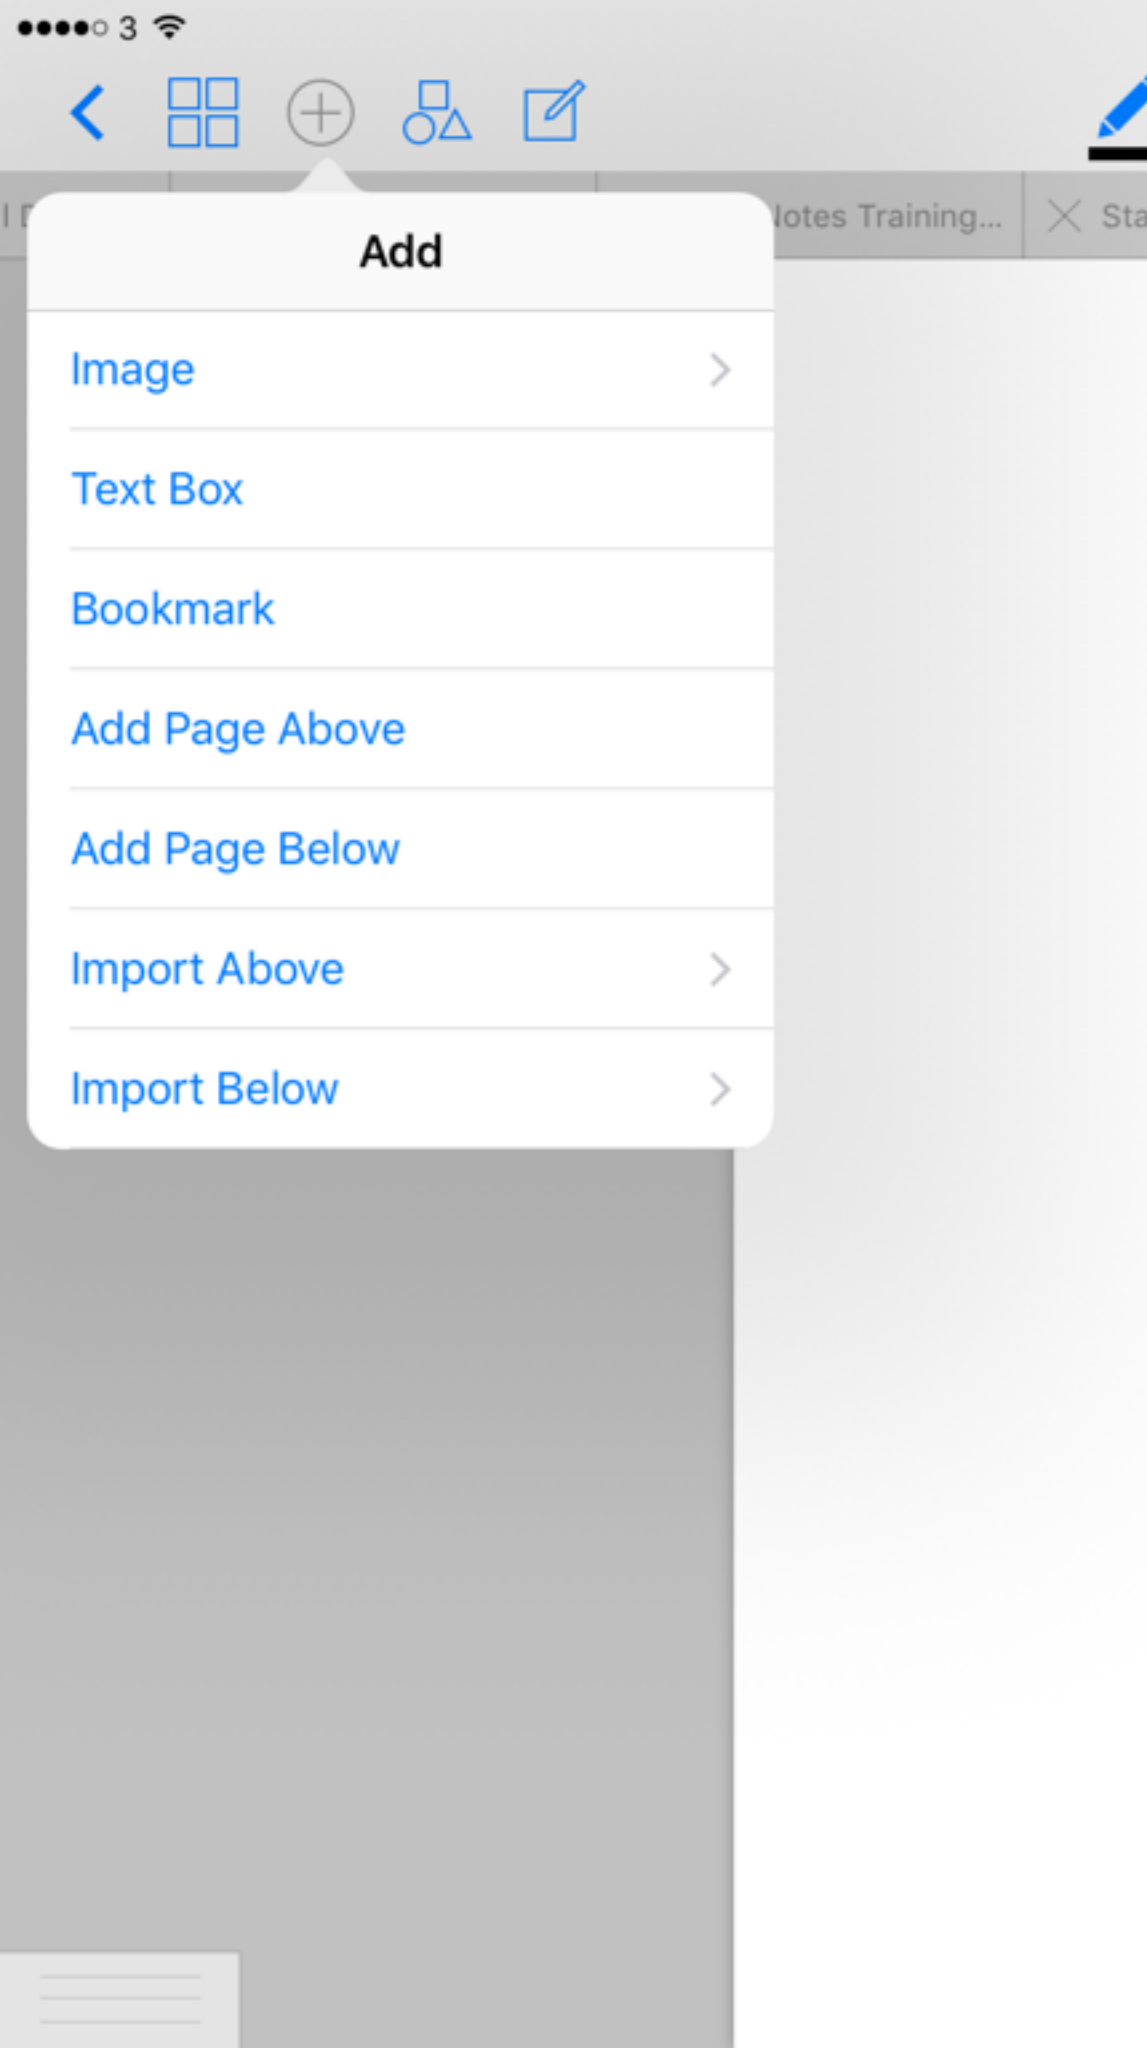

# E-Learning Express

- 👁️ **Give notebook a clear title**
- 👁️ **Much easier to identify**
- 👁️ **Suggest text tool as usually clearer**
- 👁️ **Useful if sent to Showbie**

---

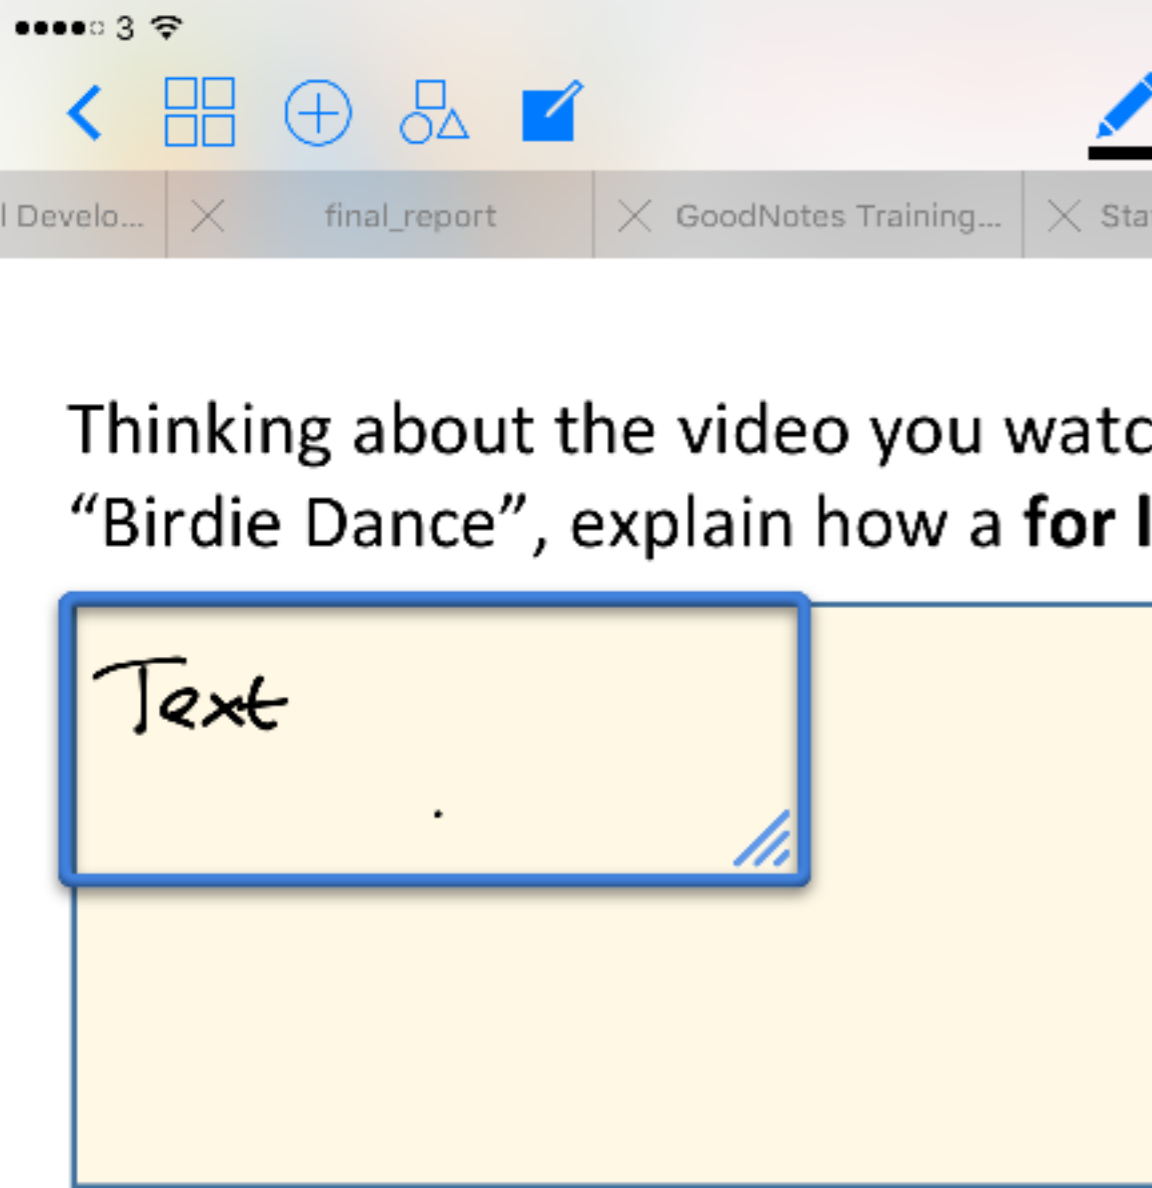

# NOTEBOOK TITLE

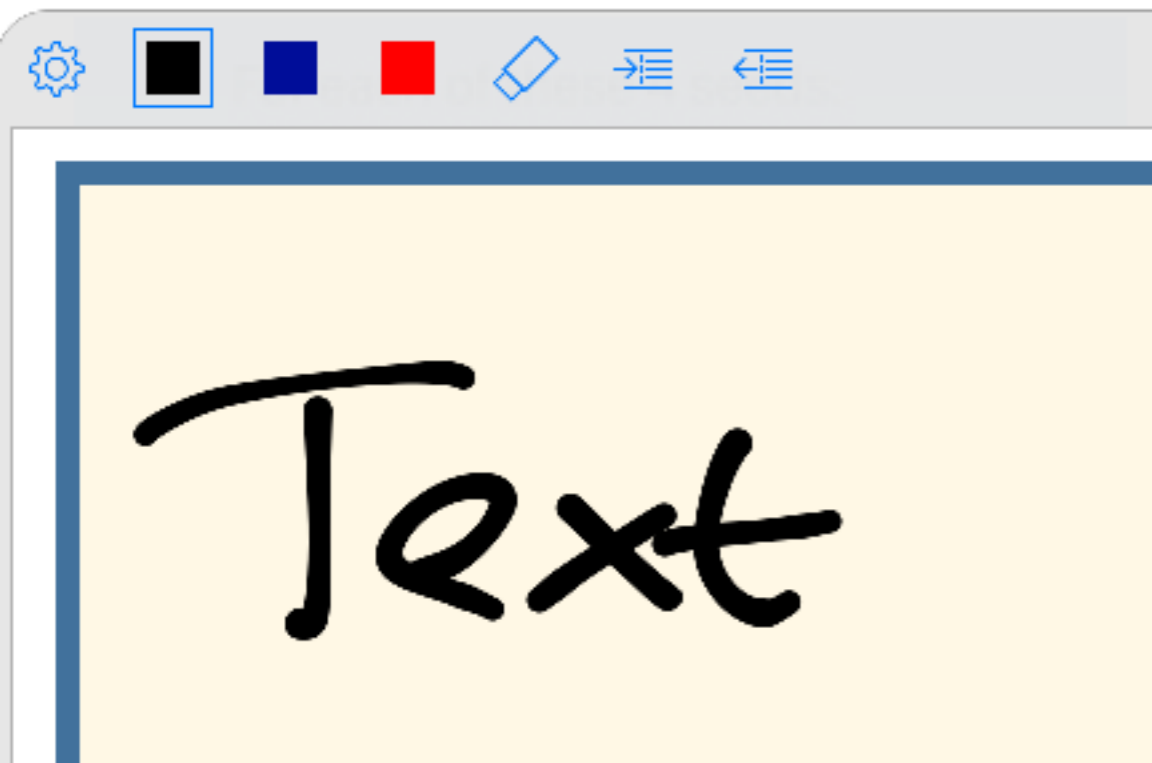

- 👁️ **Tap on the + in a circle**
- 👁️ **Add images from camera / library / Google Drive**
- 👁️ **Easily add screenshots from other apps**
- 👁️ **Add text box for typing text**
- 👁️ **Add new pages**

---

# ADD CONTENT

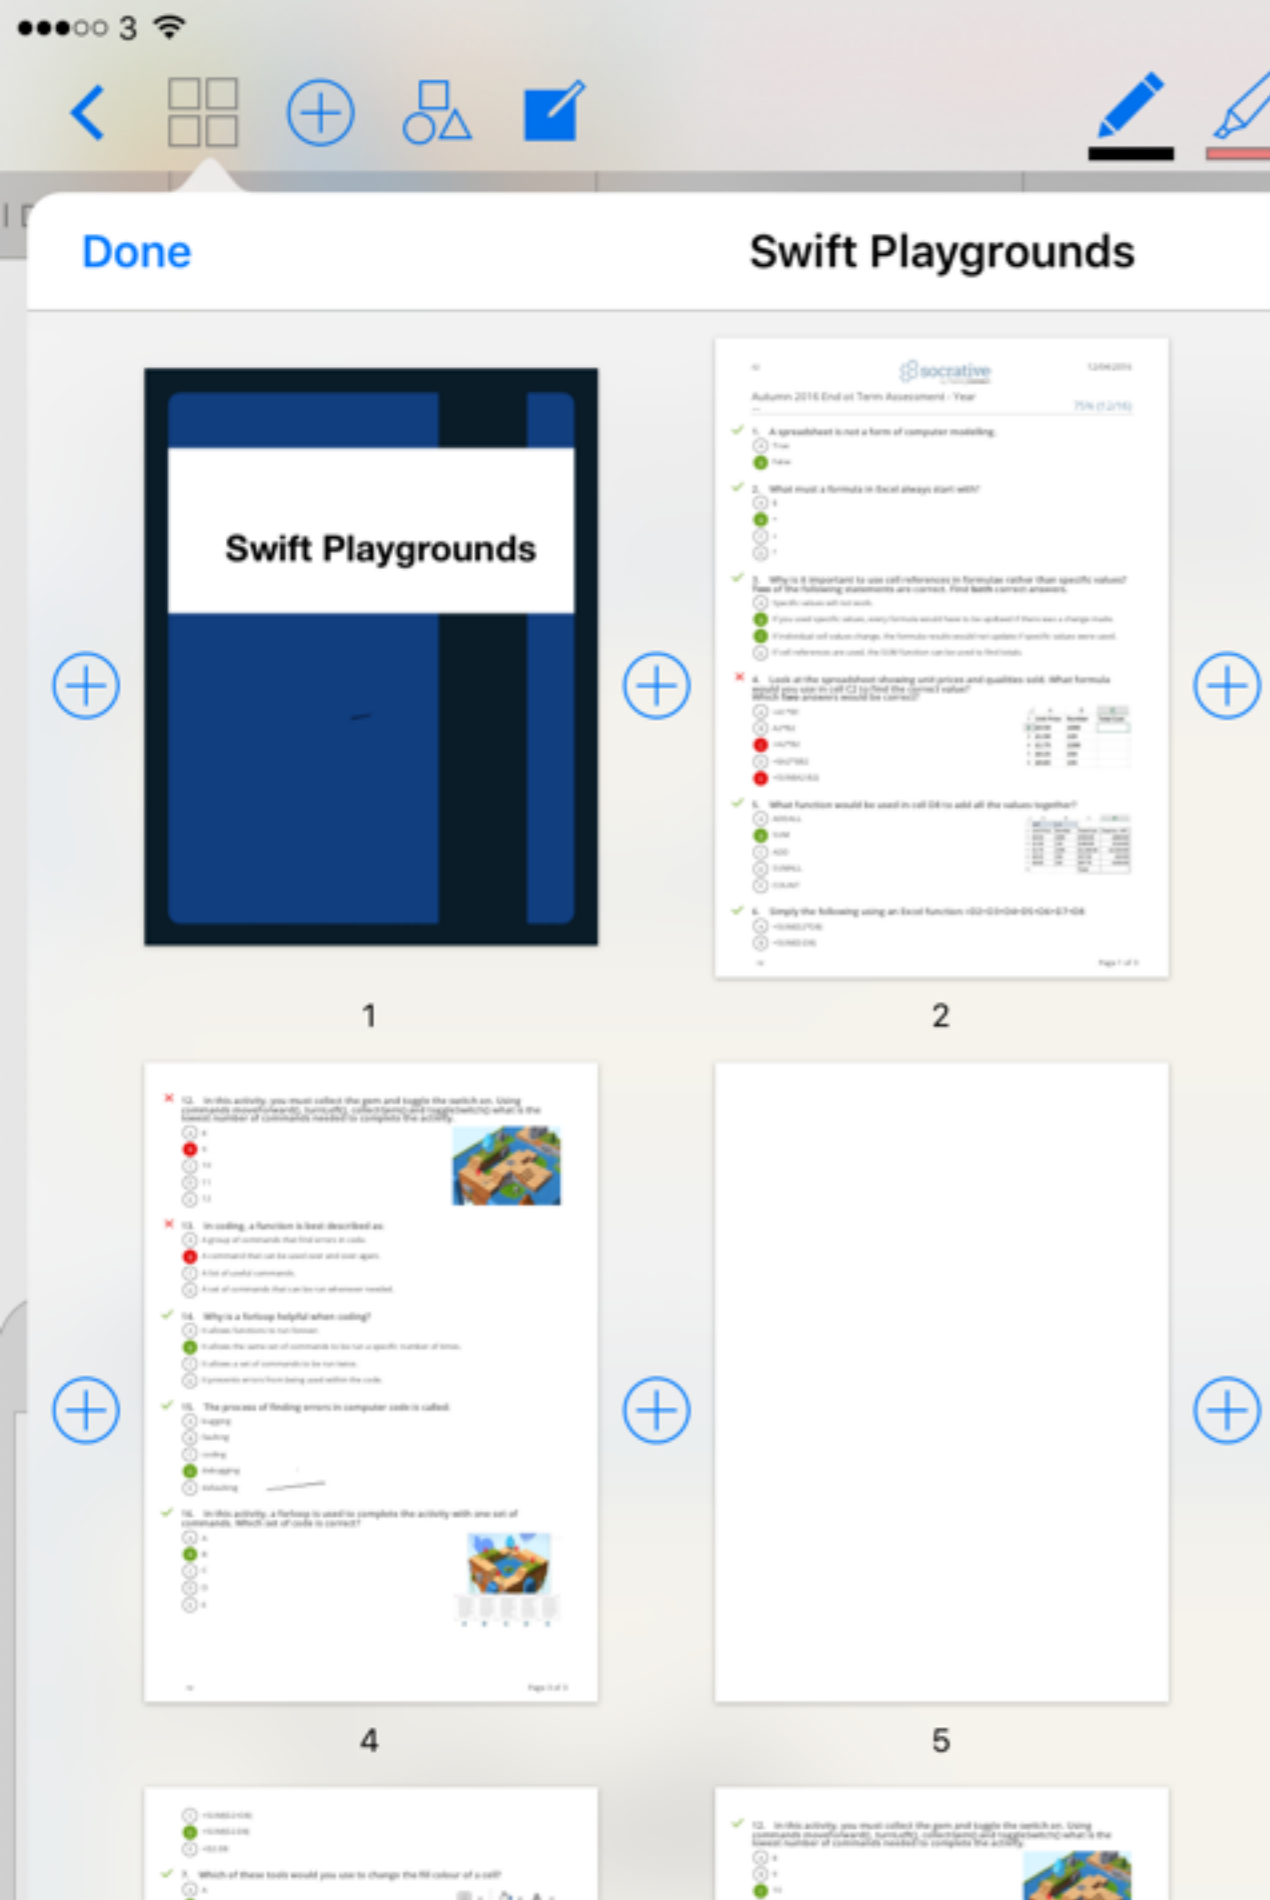

- 👁️ **Best under-used feature of GoodNotes!**
- 👁️ **Write bigger, but keep written text small**
- 👁️ **Great for filling in worksheets**
- 👁️ **Write with stylus on lined paper easily**
- 👁️ **Keep writing and the magnifier moves**

---

# WRITING MAGNIFIER

- 👁️ Copy individual documents
- 👁️ Paste copied pages into a notebook
- 👁️ Tap on the + where you want to paste pages
- 👁️ Get students to organise existing documents
- 👁️ Worksheets and user-created pages
- 👁️ Video available on website  
[www.richardchalloner.com/goodnotes](http://www.richardchalloner.com/goodnotes)

# COMPILE DOCUMENTS

## Swift Playground: Lesson 4 For Loops

Don't forget to reset each activity if you have already completed it.

Please enter text on this worksheet using the text (typing) tool.

Thinking about the video you watched in class of the animated lady doing the "Birdie Dance", explain how a **for loop** could be useful when coding:

In the Swift Playground introduction, a gardening example is given. The algorithm for the planting of the seed is given in three steps, but the steps need to be repeated four times in each row. The steps are added to a for loop that repeats the task the number of times specified:

```
for eachSeed in 1...4 {
  makeHole()
  placeSeed()
  moveFiveInchesForward() }
```

**Task 1:** Complete the activity in Swift Playgrounds called 'Using Loops'. This is a simple activity to get you started. When you step on a portal, it will take you to the start of the next row.

**Task 2:** In the activity 'Looping All the Sides', the code is written for you. You need to add the **for loop** command and specify how many time you want it to repeat. When you have added the command, you can tap on for then tap and drag the second curly bracket ( } ) below the algorithm.

```
for i in 1...4 {
  moveForward()
  collectGem()
  moveForward()
  moveForward()
  moveForward()
  turnRight() }
```

**Task 3:** Complete activities 'To the Edge and Back' and 'Loop Jumper'. Make sure you are using a **for loop** to complete the activities, not just a longer sequence of commands. Remember you can also create **functions** to simplify the code further.

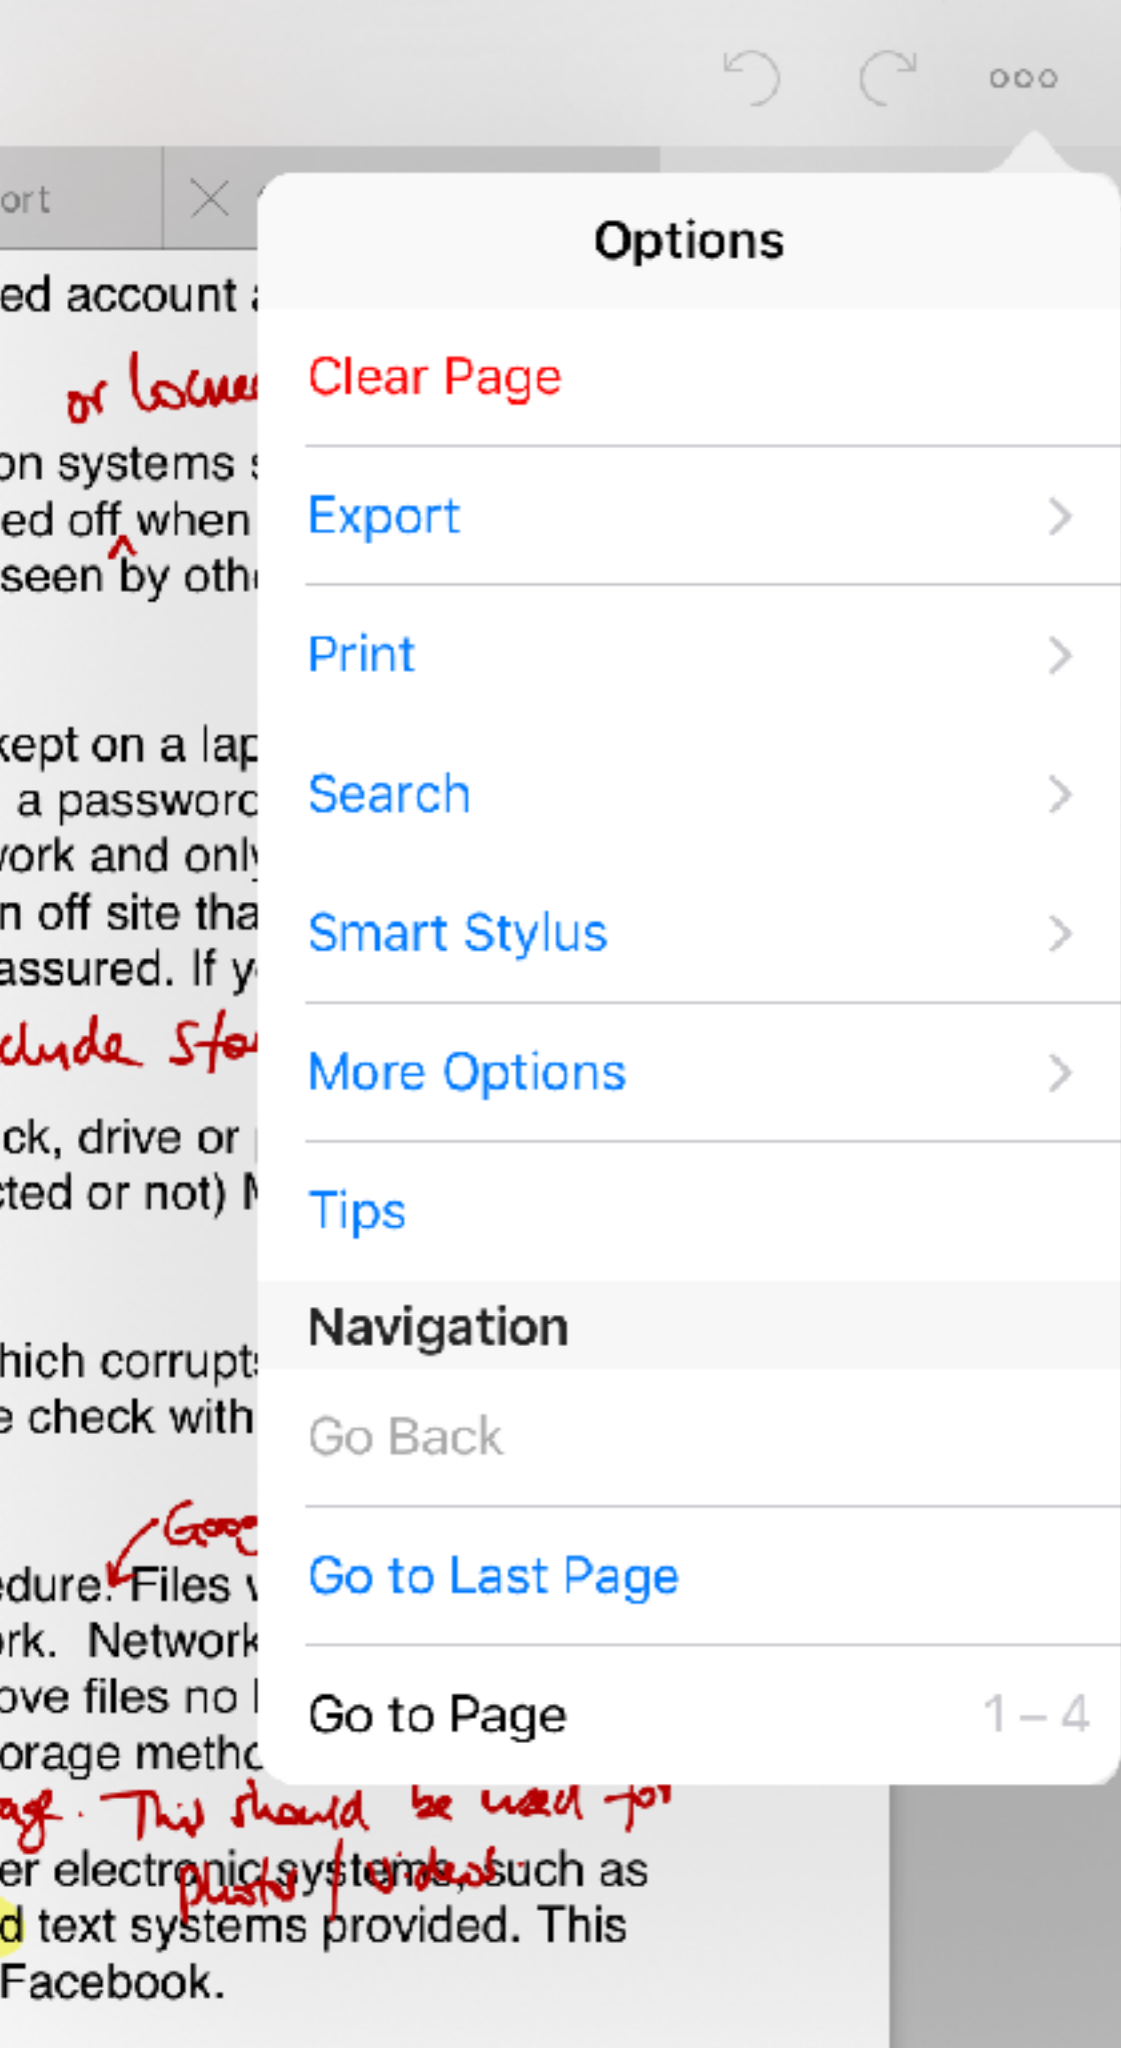

'Loop Jumper' is not as difficult as it first seems. You just need to think about the repeating pattern that will work to complete the task.

For task 3, copy and paste the code you used to complete the task into the boxes on the next page.

- 🌀 Adding a PDF from Showbie?
- 🌀 Get students to open GoodNotes first
- 🌀 Open Notebook to where they want new PDF
- 🌀 Then go back to Showbie and send PDF
- 🌀 This will insert PDF into the notebook
- 🌀 Otherwise they will have to copy in manually

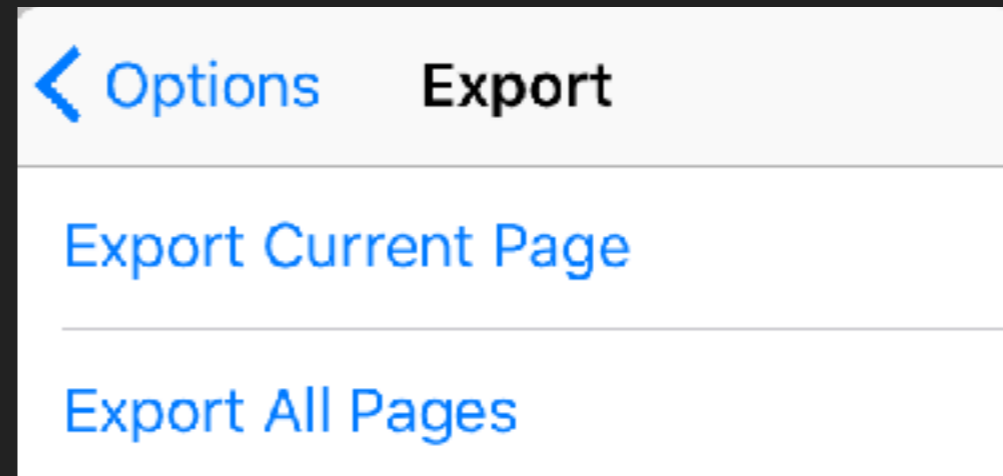

# INSERTING FROM SHOWBIE

👁 Tap on menu (top right)

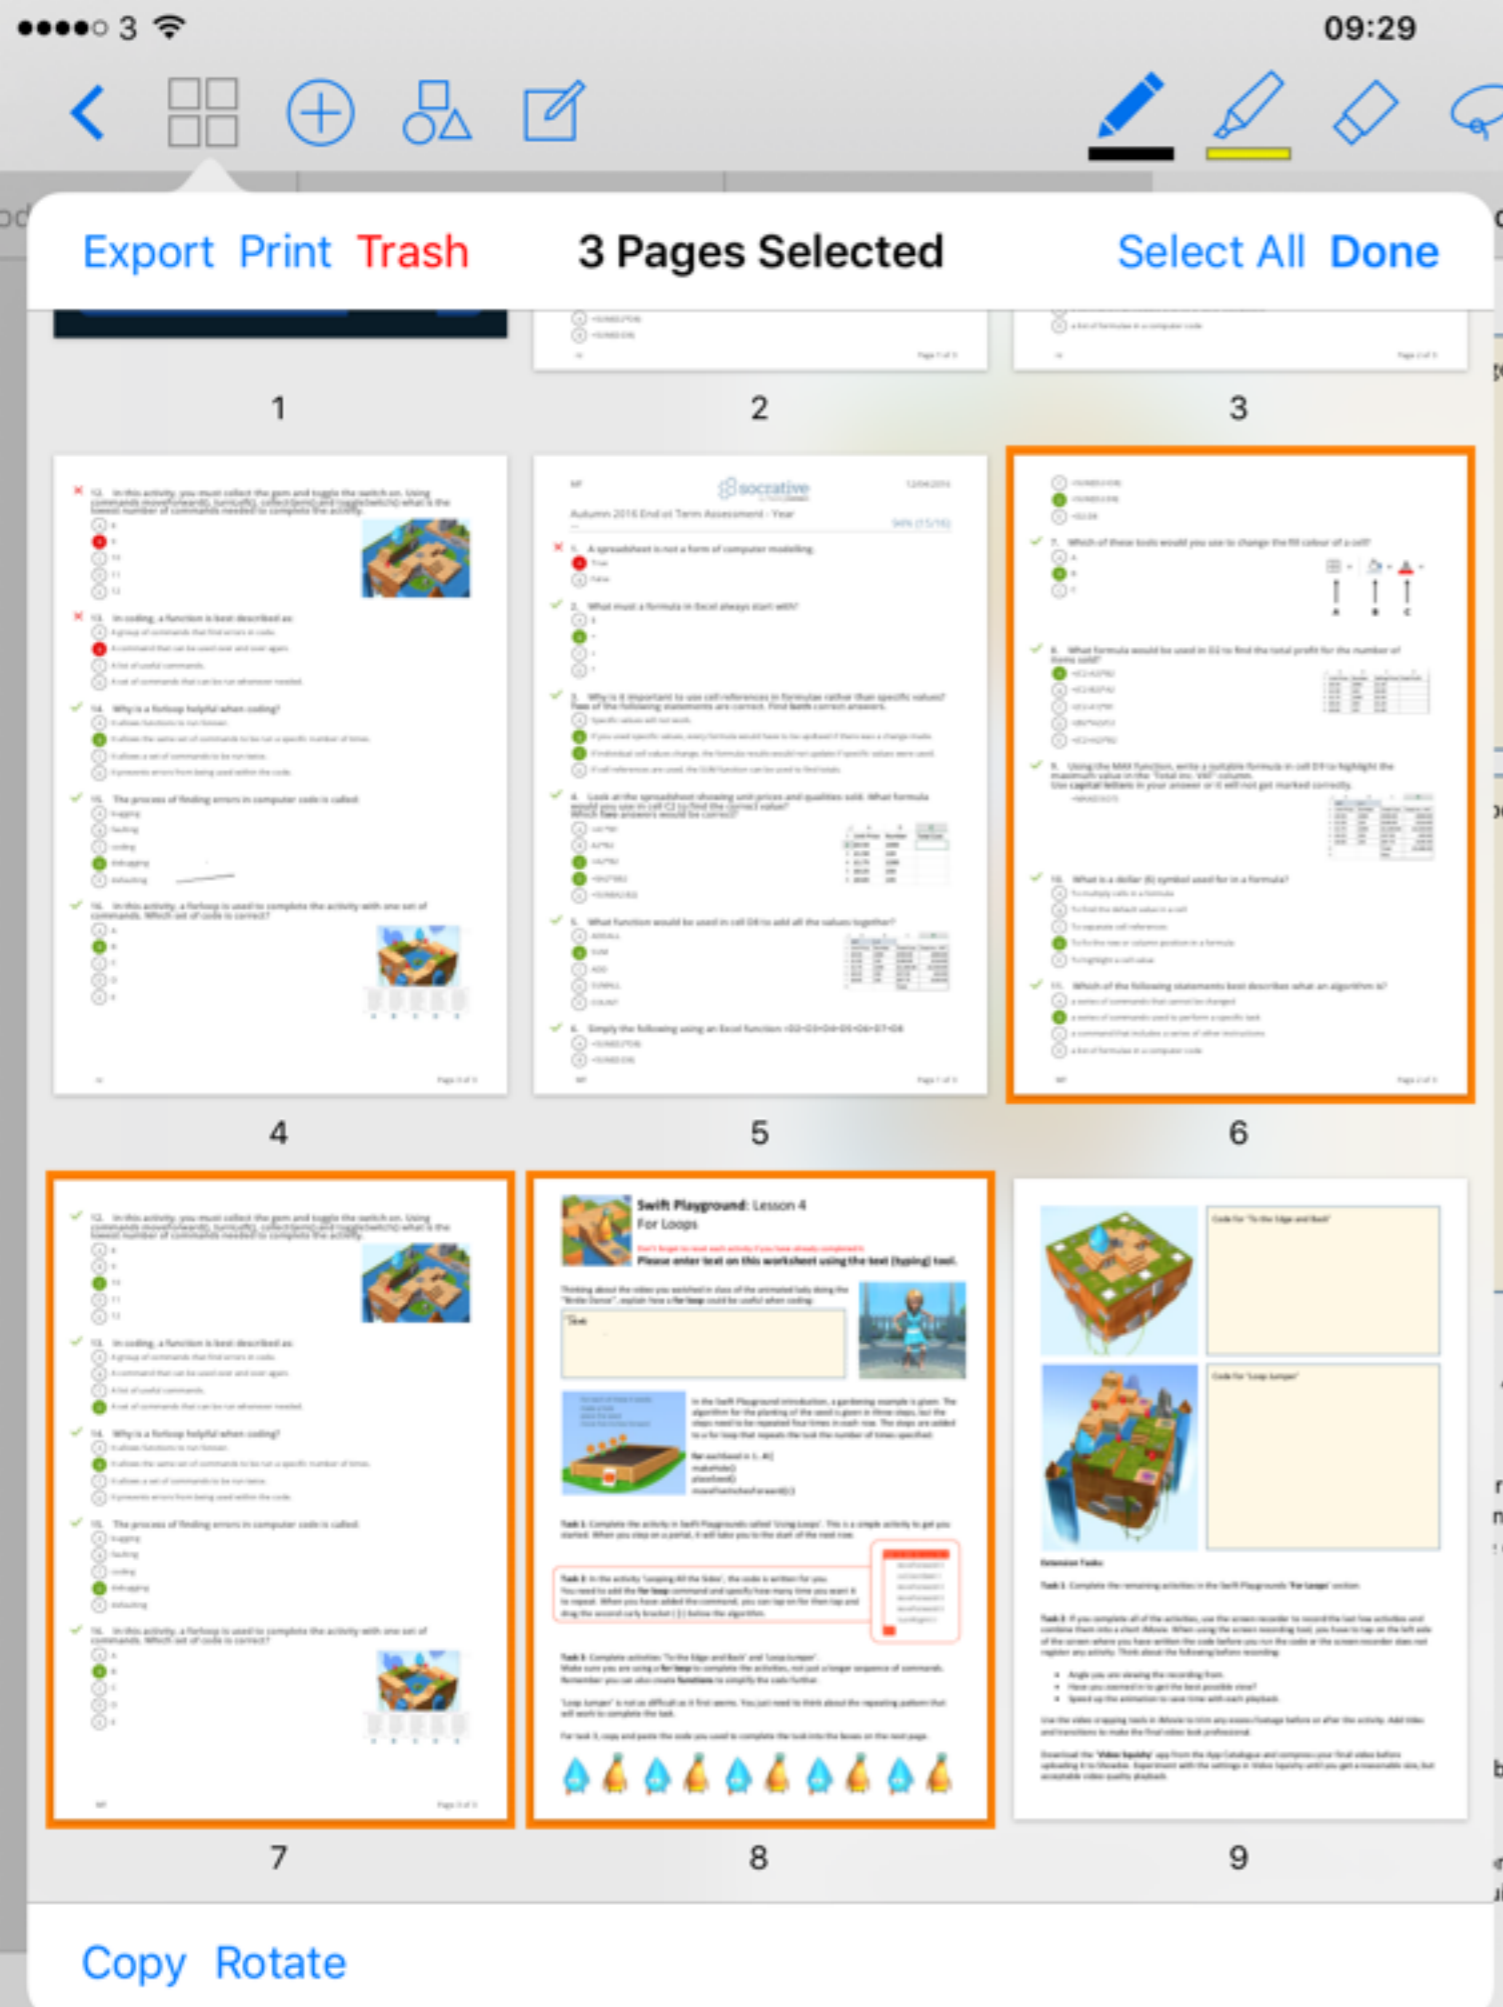

👁 Tap on Export

👁 Two options:

👁 Suggest PDF export if reviewing in Showbie etc.

# EXPORT

- Export specific pages from a notebook
- Enter page mode (4 squares)
- Tap on edit (top right)
- Select pages for export
- Tap on export
- Export in usual way
- Only pages selected will export

SELECTED EXPORT

# Foldr

- 🌀 Encourage students to archive Notebooks in Foldr
- 🌀 Send to Foldr as PDF for easy viewing
- 🌀 Delete notebooks from GoodNotes to save space
- 🌀 Backup / export of GoodNotes file if necessary

---

## GOODNOTES SUPPORT

GoodNotes is a great app, but if you don't organise it properly you can't find what you need!

You will also need to do some 'housekeeping' and organise your notes at a later date for revision.

The following training videos take you through the basics:

- Automatic backup using Google Drive
- Renaming of documents / notebooks
- Organisation of documents / notebooks

 [www.richardchalloner.com/goodnotes](http://www.richardchalloner.com/goodnotes)

 **Simple how-to videos**

 **Other iPad app support**
